"Sarah's workshops are a breath of fresh air!"

WHAT SORT OF ANIMAL AM I ?

Prep
to
Yr 4

Students learn about some of the incredible animals in Sarah's books through storytelling, puppetry and a multimedia presentation. They then embrace their 'inner animal' and colour an animal mask to take home.

1 CLASS SESSION

Yr 3
to
Yr 6

THE COOLEST ANIMALS YOU NEVER KNEW EXISTED

This workshop starts with a multimedia presentation introducing some of the coolest rainforest animals on earth. Then students become part of the action: using puppets to act out a story from *Wildlife Wong and the Fig Wasp*.

1 CLASS SESSION

RAINFOREST IN A JAR

Yr 3
to
Yr 7

Did you know the oldest terrarium in the world was built in 1960? Sarah explains how a rainforest system works, and explores themes of biodiversity. Then students make their very own rainforest in a jar to take home.

1 CLASS SESSION

Yr 4
to
Yr 7

SCIENCE STORYTELLING: FACT OR FICTION?

Sarah uses her books to explore the differences between nonfiction and fiction; narratives and informational text. Students learn the importance of research, planning and editing, and add tools to their own writing toolbox. They even get to help Sarah research her next book!

1 CLASS SESSION

WHO'S IN MY PLAYGROUND?

Yr 4
to
Yr 9

When Curious Kai meets scientist Matthew Connors, she learns all about tiny critters and their importance in ecosystems. In this workshop, teams build a quadrat (a grid which scientists use to count flora and fauna). Then they use it to investigate before sharing their findings.

1 CLASS SESSION

Yr 7
to
Yr 12

WRITING THE ENVIRONMENT

Science needs communicators! Building on the 'Fact or Fiction' workshop, or as a stand-alone workshop, students learn to hone their observation skills. With their tools sharpened, they put them to the test by planning and writing an environmental story.

1-2 CLASS SESSIONS

PARLIAMENT OF ANIMALS

Yr 6
to
Yr 11

This exploration of civics and stewardship is suitable for one class or a group of student leaders. Hypothetical developers propose a bridge across the river in a rainforest village. The mayor (Sarah) calls a town meeting and invites human and non-human residents. Students are allocated a character, research their character's needs, then present their perspective at the town gathering before voting for or against the bridge takes place. The day ends with a discussion of civics, through both an Australian and global lens.

HALF DAY, OR A SERIES OF SESSIONS
